III. Reports:

A. Status of Pools and Preparations for Opening

Staff member Dimaline provided a briefing of the preparation of both pools. The Forest Oaks pool will need to have four skimmers replaced. These require breaking the cement around the pool deck. The cause of water loss was determined to be the skimmers and pool lights. Three of the six pool lights leak and will also need to be chipped out and light rings and seals replaced. There are also some valves leaking around the equipment in the pump house. The City utilized a HUB vendor search process, and has gone ahead with San Antonio Pool Management to make the repairs. They have already started on the repairs and will have them completed well before the pool opening.

The inside of the pool room at Forest Oaks is undergoing a re-painting and the addition of French doors being installed onto the patio area. The City also has ordered a new refrigerator, freezer, and updated the concession stand. The Community Pool is in overall good shape. Some algae has started in some areas of the Community Pool over the winter months and San Antonio Pool Management will need to drop the water level down low enough to scrub these surfaces and remove. This will also be done before the opening on Memorial Day weekend.

Committee members reiterated the importance of getting notice out in advance of the pool opening. Staff member Dimaline stated that Public Works would continue to work with City Hall staff to help get the word out using the City's web site and social media sites.

General discussion began on when to schedule the next meeting, and it was decided the Committee will meet in June after the pools have been in opened and in operation.
