

PERMITTING, BUILDING, & ZONING CONCERNS

Q: A resident expressed concerns with a recent overlay of the street which he said was “done poorly”. The resident used to work in this area and stated that the work was uneven and sloppy. He also reported that the church on Evers and Huebner has cut down many, many trees and he was wondering if that violated any City policies. He would like to see the easement alongside his home be paved by the City.

A: The company that laid the slurry has been contacted and will return to correct the overlay. Public Works will assess the easement for possible paving and will notify the resident of our findings.
