Bexar County Flood Control - Notice of Construction Huebner Creek NWWC Segment 3 (LC 17)

To whom it may concern,

Bexar County Public Works will begin construction in February 2017 on the Huebner Creek NWWC Segment 3 flood control project. The purpose of this project is to reduce the floodplain limits between the San Antonio/Leon Valley city limit line and Bandera Road by widening and realigning the Huebner Creek channel. The work is expected to take approximately 18 months with an anticipated construction cost of \$15.8 million.

Construction related activities include: clearing in the channel, channel excavation, utility relocation, grading and concrete work, storm drain improvements, new culverts, and planting and seeding of new landscape vegetation. The contractor is Oscar Renda Contracting, Inc. and construction inspection services will be performed by Jasmine Engineering, Inc. The Bexar County Flood Control Construction Manager is Leonard Adame.

If you have any questions or concerns during the course of the project, please call the **Bexar County Flood Control office at (210) 335-7066**. In addition, feel free to visit www.BexarFloodControl.org for construction updates.

Thank you,
Bobby Mengden
Bexar County Flood Control Program Manager
