RETAIL GAP ANALYSIS | OVERVIEW

The Retail Coach utilizes a proprietary model that estimates retail spending potential for a retail trade area based upon population, income, and consumer spending patterns. Using the algorithms within this model, we are then able to determine the extent to which a community is or is not capturing its sales potential based upon retail sales data published by Claritas, a private demographic and data vendor.

In order to determine the anticipated pattern of retail spending for a trade area, our model uses a benchmarked control area. For the purposes of this study, the control area has been defined as the State. The purpose of the control area is to account for characteristics unique to individual markets that might artificially inflate or deflate the calculated spending pattern of area residents.

Understanding the pattern of retail spending within a community as it relates to the spending patterns of the State is critical. The Retail Coach's model analyzes these patterns for all retail sales in an area, including taxable and nontaxable sales, to further determine which retail sectors are exhibiting "leakage" and which sectors are exhibiting "surplus."

Or, put more simply, retail sectors in which spending is not fully captured are called "leakage" categories, while retail categories in which more sales are captured than are generated by residents are called "attraction" or "surplus" categories.

A retail sales surplus indicates that a community pulls consumers and retail dollars in from outside the trade area, thereby serving as a regional market. Conversely, when local demand for a specific product is not being met within a trade area, consumers are going elsewhere to shop creating retail leakage. Retail strategies can be developed for specific retail sectors by analyzing the estimation of retail surpluses and leakages, giving retailers a snapshot of the relative strengths and weaknesses of a community's retail market. Generally, attraction or surplus categories signal particular strengths of a retail market, while leakage categories signal particular weaknesses.

It should be kept in mind that a retail trade area analysis is based on averages. Many times there are mitigating factors that can cause a trade area's retail potential to deviate substantially from ordinary market conditions. Proximity to larger regional shopping areas, natural barriers (such as lakes and mountains), and road systems are just a few of the factors that could greatly impact a market's retail potential.

A Retail Gap Analysis is not designed as a detailed plan of action nor is it an exact science. Rather, it provides the necessary input for the most important aspect of a retail development strategy - the recruitment of retailers for those retail sectors that are currently not meeting the needs of a community. Please see the section entitled "How to Best Utilize the Retail Gap Analysis" for additional suggestions on using the Retail Gap Analysis to help create and carry out your comprehensive development strategy.

RETAIL GAP ANALYSIS | OVERVIEW

All primary retail categories are studied using the most current data available. Potential sales are compiled and compared to estimated actual retail sales to determine if there is a surplus or leakage of retail trade.

Retail sales estimates are computed at the establishment level by using actual sales volume data available for publicly held companies. Therefore, only a minority of businesses on the infoUSA™ base file has sales volume data when the file is delivered to Claritas. Claritas models sales volume based on actual data from a national sample of approximately six million businesses. The model is calculated at the four digit Standard Industrial Classification (SIC) code level with the results applied to those records for which no actual sales volume exists. This enhancement results in virtually all records having an estimated sales volume, except for government records. For a more detailed look at the SIC code level breakdown, please see Appendix A: SIC Code Detail Listing.

The following excerpt is the “Sales Volume Data” section of the Claritas Business-Facts Methodology (February 2002) and should provide an overview of how Claritas’ numbers are derived:

Sales Volume Data

InfoUSA™ provides actual sales information only for publicly held companies. Sales figures, therefore, for all other companies must be estimated. The infoUSA™ model uses aggregated sales divided by the aggregated number of employees by SIC to arrive at sales per employee. This aggregated method does not factor in the distribution of employees by SIC, and may allow large corporations to have a disproportionate effect on the sales-per-employee estimate.

In comparison, Claritas models sales volume based on actual data from a national sample of approximately six million businesses. The model is calculated at the four-digit Standard Industrial Classification (SIC) code level with the results applied to those records for which no actual sales volume figures exist. This enhancement results in virtually all records having an estimated sales volume, except for government records. However, since one number is being applied to remaining businesses in a four-digit SIC industry, analyzing a business as a member of a sales range is more appropriate than looking at the specific sales volume for that business.

As with the employment information, Claritas’ clients will benefit from the combined actual/modeled sales data with better coverage and more information for modeling and other analytical applications.

Retail Gap Analysis Notes

In some markets, two particular situations may appear to be discrepancies when they occur in a Retail Gap Analysis.

First, the amount exhibited for a particular SIC sector’s estimated actual sales may be lower (sometimes significantly so) than expected. In these circumstances, the retailers have often reported sales figures under a different SIC code.

For example, some Women’s Clothing Stores (SIC 562) may in fact report sales figures under Family Clothing Stores (SIC 565), etc.

The second situation arises when the amount exhibited for a particular SIC sector’s estimated actual sales is reported as \$0, even though there are known retailers in a market operating under that SIC code. When there are only two or three retailers in that market reporting under that SIC code, the numbers are often reported as \$0 to protect each retailer’s proprietary financial information.

For example, if there were two retailers in a market operating under a specific SIC code, and total estimated actual sales were listed, either retailer could extrapolate its competitor’s estimated actual retail sales figures by deducting its own figures from the total listed for that SIC code.

UTILIZING THE RETAIL GAP ANALYSIS

1. Identify retail sectors with leakage amounts.

If your community's Retail Gap Analysis shows Shoe Store leakage of \$1,250,000, this means that consumers in your community are routinely traveling outside of your community to purchase shoes.

This may signify the need to recruit a regional or national brand shoe retailer to secure a site in your community and stop the Shoe Store sales leakage.

It also identifies the opportunity for an existing retailer in your community to expand its merchandise mix to include shoes or to expand its shoe offerings.

2. Based on this list of leakage sectors, research and identify target retailers (and restaurants), and then determine if their site selection criteria and your community's demographic profile is a match.

If the Retail Gap Analysis identifies a Shoe Store leakage, this is an opportunity to target specific shoe store retailers for recruiting to your community.

Determine the site selection criteria of each targeted shoe store retailer and compare it to your community's retail trade area demographic profile to determine if it is a match. If there is a match, the targeted retailer becomes a prospect.

Based on this research, you may identify various prospects such as Shoe Show, Rack Room Shoes and Payless ShoeSource for your community.

Targeting the right retailers and restaurants for your community increases your ability to recruit those which are a "best fit" and helps eliminate wasted time in trying to recruit those whose requirements are unattainable by your community. It takes great time and effort, but in the long run, performing this step correctly increases your community's odds of retail success.

3. Research and identify the real estate site selectors for each targeted retailer and keep track of their contact information in a database or a spreadsheet.

Using the list of prospects identified above, contact each prospect's corporate office, ask to speak with the real estate department and obtain the name and contact information for the site selector who is responsible for new store development in your specific geographic region.

Often, corporate site selectors will work through real estate brokers who perform cursory reviews of your community's markets and specific sites within your community, before information is forwarded to the corporate site selector.

There are numerous calls and contacts to be made, and there are many steps in this process of bringing together the prospects and your community, if even for preliminary consideration. Again, this step requires great time and effort, but it is a vital step in recruiting the right retailers to your community

4. Identify potential locations in your community for each targeted retailer, based on their specific site selection criteria.

Before you personally contact the targeted retailers, you need to identify potential locations in your community based on their specific requirements.

It would be beneficial to maintain a database of all available properties in your community, and update this data on a regular basis as property specifics and availability may change often in some areas, especially as it relates to your ongoing contact with retailers.

Each retailer has a preference as to which property type best fits their needs. It could be freestanding buildings, inline spaces in a shopping center or pad sites in front of regional shopping centers (We have included the Retail Site Data Form in Appendix B as an example of the type of information to gather and keep on file regarding each property).

What retailers look for:

- a. Market Conditions – retailers look for stable-to-improving communities. If you have a new business or a planned business, put up a sign that says, "Project Coming Soon."

- b. Community Development – a clean, attractive community does make a difference to retailers. Safety and security are essential.

- c. Downtowns – most retailers still recognize downtowns as the "pulse" of a community, especially smaller communities. A healthy, vibrant downtown usually equates to a healthy, vibrant community.

- d. Visibility – retailers have got to be seen. As a result, they look for sites that consumers can view from as far away as possible. A good example is that it takes time for a driver to make decisions, so the sooner the driver can spot the retailer, the more time the driver has to make preparations to exit the highway, main road, etc. This is the reason why corner locations are preferred by most retailers.

- e. Accessibility – retailers look for easy, ample and clearly-marked entrance-exits from both directions of traffic. Retailers often use the terms Ingress (entrance) and Egress (exit).

- f. Traffic Counts – retailers look closely at the number of vehicles passing in front of a location during a 24-hour period. The higher the traffic count – the more sales potential the retailer will have from that location.

UTILIZING THE RETAIL GAP ANALYSIS

g. Parking – adequate parking is a priority for all retailers since most locations' consumers will arrive by car. A bad parking experience will cloud consumers' views of a retailer's location and store.

h. Demographic profile – retailers look for locations in communities with high population density and high disposal income. Market your community in its strongest light - as a retail trade area population and not a community population. Population density and disposable incomes directly correlate to retailers sales volumes.

i. Competition – retailers pay close attention to their competitors and their locations, not wanting to be out-positioned. They do not want a secondary site to their competitors.

5. Send copies of the Retail Outlook Guide and Retail Gap Sector Summaries electronically or via postal mail to each targeted retailer.

Introduce your community to the prospective retailer by sending them the Retail Outlook Guide. Within a few more weeks, after they have had time to review the Retail Outlook Guide, send them the sector-specific Retail Gap Sector Summary. Both of these are included in the Retail Gap Analysis' appendices.

6. Personally contact each targeted retailer to see if they received the information and address any questions or comments they may have. And be sure to invite them to your community.

Position yourself to strongly sell your community, your retail trade area and specific opportunities based on the Retail Gap Analysis and sector-specific leakage amount.

Be able to fully explain the Retail Gap Analysis and how the leakage numbers are determined.

7. Follow up, Follow up, Follow up. You must be persistent as it may take numerous attempts to reach the retail site selectors and/or their real estate brokers.
8. Introduce the Retail Gap Analysis and its findings to entrepreneurs and existing retailers in your community. Educate them on how the analysis may be used to identify new retail opportunities and expand merchandise lines.

You may have opportunities right under your nose. For example, recently in a small community with a population of little more than 5,000 persons, the Retail Gap Analysis was used to expand a struggling downtown merchants product lines.

In that same community, the Retail Gap Analysis was used to direct an entrepreneur in establishing and opening a sporting goods store that has expanded from a leased storefront operation to a freestanding retail operation that successfully serves a broad merchandise offering.

9. Present the Retail Gap Analysis to existing property retail owners and prospective retail developers and educate them on how the findings can assist in developing their retail leasing strategies.

The Retail Gap Analysis will assist existing property retail property owners and prospective retail developers in developing a targeted retail leasing strategy.

For example, if an individual owns a lot on a major thoroughfare and it is determined that the community is leaking restaurant sales, the property owner may want to determine voids in the fast food industry and target companies for the site.

Also, if a community is leaking general merchandise sales, grocery sales and drug store sales to surrounding communities, developers may use this information to persuade grocery retailers and/or drug store retailers to take a close look at development property.

10. Continue to maintain a database of retailers and keep track of all calls and comments.

Each community in the nation is competing with others for the very same retailers, and while it can be certain that retailers will locate and expand in multiple communities, what guarantee is there that they will even consider your community in the future?

You may have the best demographics in the world for a community, but unless a retailer knows this, you are just one of many communities "hoping" to land another retailer. These retailers do their homework, and if your community is going to succeed in locating them, you need to do yours, too.

Remember, you are effectively in a sales position now, basically selling your community. Effective salespeople know that keeping in contact with clients and prospects is one of the top behaviors that distinguishes success from failure.

A few suggestions to help you maintain better communications:

- a. Create a database of retailers that you have been in contact with (determined earlier in this section). Update this database with comments from every conversation you have with them.
- b. Know and keep track of the retailer's property requirements and keep track of available properties in your community which may meet these requirements. Know their demographic requirements, as well.
- c. Contact the retailers periodically to let them know of new property, demographic or community developments they may be interested in.
- d. Keep your community in front of retailers' "faces" so that when they are ready to move, your community will be forefront in their minds.
- e. Make use of the Retail Outlook Guide and the Retail Gap Sector Summaries in this report.

RETAIL CATEGORIES

Building Materials, Garden Supply and Mobile Homes

Making up the building materials category are lumberyards, hardware stores, paint stores, nursery stores, garden and lawn supplies, mobile home dealers and other miscellaneous materials stores. This sector holds a strong lure for farmers, many who will conduct other shopping in town, along with keeping local do-it-yourselfers in the community to shop.

General Merchandise Stores

The general merchandise category consists primarily of department stores (i.e. Wal-Mart, K-Mart, J.C. Penney, Sears, Belk) and variety stores (i.e. Dollar General, Family Dollar). Comparable to anchor stores in a shopping mall, these department and variety stores, play an important role in communities and are strong attractants to shoppers.

Food Stores

The food store category is comprised primarily of grocery stores, but also includes bakeries, meat and fish markets, fruit and vegetable markets, dairy product stores, candy and confectionery stores and miscellaneous food stores. This category is extremely important to a healthy retail sector as customers spend more money in grocery stores and shop there more often than any other type of store.

Automobile Dealers and Gasoline Service Stations

New and used car dealers, auto supply stores, gasoline service stations, boat dealers, motorcycle dealers and recreational vehicle dealers make up the automotive retail category.

Apparel and Accessory Stores

Apparel stores are made up of men's, women's and children's clothing stores as well as shoe stores. Small towns have a challenge of sustaining these types of stores due to the extreme competition from department stores and stores in larger cities. In today's environment, apparel stores exhibiting strong customer service and a family-oriented atmosphere will have the best opportunity for success in smaller towns.

Home Furniture, Furnishings and Appliances

This category includes furniture stores, floor covering stores, major appliance stores, music, video, CD stores and consumer electronics stores.

Eating and Drinking

This category consists of restaurants, taverns and bars and is a rapidly growing part of most economies since more and more people are eating away from home.

Miscellaneous Retail

This miscellaneous sector includes different "specialty" retail business that could not logically be categorized into the previous retail groups. Drug stores, sporting goods stores, book stores, liquor stores, hobby and craft stores, game shops and jewelry and others are included in this category.

PRIMARY RETAIL TRADE AREA | GAP ANALYSIS SUMMARY

The Retail Coach, LLC

About The Retail Coach

The Retail Coach, LLC, is a national retail analytics and locational intelligence firm that specializes in all aspects of retail market analyses and recruitment, from “macro to micro” trade area assessment to actively recruiting retailers on behalf of our clients.

Through its unique Retail:360 process, The Retail Coach offers a dynamic system of products and services that better enable communities to maximize their retail development potential.

Retail:360 Process

Providing more than simple data reports of psychographic and demographic trends, The Retail Coach goes well beyond other retail consulting and market research firms’ offerings by combining current national and statewide demographics and trend data with real-world, “on-the-ground” data gathered through extensive visits within our clients’ communities.

Every community is different, and there is no “one size fits all” retail recruitment solution. Compiling the gathered data into client-tailored information packets that are uniquely designed for, and targeted to, specific retailers and restaurants who meet the community’s needs helps assure our clients that they are receiving the latest and best information for their retail recruitment efforts — all with personal service and coaching guidance that continues beyond the initial project scope and timeline.

Our Retail:360 process assures that communities get timely, accurate and relevant information. Translating that data into the information that retailers need and seek assures our clients even better possibilities for tremendous retail growth and success.

The Retail Coach - It’s not about data. It’s about your success.

Acknowledgements

The observations, conclusions and recommendations contained in this study are solely those of The Retail Coach, LLC and should not be construed to represent the opinions of others, including its clients, or any other entity prior to such entity's express approval of this study.

Sources used in completing this study include: infoUSA™, Applied Geographic Solutions, Nielsen 2012/2013, ESRI 2011/2012, U.S. Census Bureau, Economy.com, International Council of Shopping Centers, and/or U.S. Bureau of Labor and Statistics.

To better represent current data, where applicable, portions of estimated actual sales may be calculated using an average sales per square foot model.

Mapping data is provided by MapInfo, Nielsen, ESRI and/or Microsoft Corporation.

All information furnished is from sources deemed reliable and is submitted subject to errors, omissions, change of terms and/or conditions.
