

QUESTIONS AND ANSWERS  
May 23, 2016

**RFQ Engineering and Construction Management Services for Evers Road Bridge**

The following questions were asked via email communication on Fri., 05/20/2016. The answers appear in red and are provided here for your reference.

1. What does the City have in mind regarding construction management? Do you want full construction management throughout the construction phase, including startup, scheduling, quality management, contract management, materials testing, field engineering, inspection, etc? Or do you want Construction Administration services from the design engineers – services that would include reviewing submittals, answering RFIs, and a few periodic field visits. **We will need full construction management services, to include all the reporting required by TxDOT.**
2. Since this is an MPO project, are there any DBE requirements on the contract as a whole, either on the design or the construction side? **Yes – we signed an agreement with TxDOT to adopt their DBE program.**
