**Census
2020**

Our City was designated as one of the Hardest to Count (HTC) tracts in the nation in 2010 and designated in 2018 as a Mental Health Professional Shortage Area (HPSA) in Bexar County. This indicates health care provider shortages in primary care, dental health; or mental health. Our goal is to considerably improve our Bexar County, City of Leon Valley statistics.

In order to accomplish this, we are requesting everyone to complete their Census 2020 questionnaire! Our measure of success will be in obtaining an accurate and complete census necessary to determine fair allocation of federal dollars for resources, services and infrastructure that support our everyday quality of life. Overall, the success of our Census 2020 campaign has the potential to result in the “community well-being includes community health; economic resilience; educational capacity; household stability; and environmental adaptation.” The City of Valley’s goal is to surpass our Census 2010 Complete Count response rate of 76%, as a result being able to eliminate health disparities in our community and achieving health equity.” “You Count Leon Valley!”.
